Practical Politics.

It has been said that he would be a failure
as a public speaker, that he could not make a
speech; that he could not copy in argument
with his associates in Congress. That delosion has been dispelled; I have heard him
and I want to say that he can convince his
hearers on the public questions of the day.
He has developed into a strong stump speaker, and can take care of himself in any disconscion on any forum. But after all is said,
it is not the Spread Eagle orator that "makes
things come to pass" in Congress or elsewhere.

Look out for the 'leventh bour campaign liar, who springs a political sessation just before election day—too late for those concerned to get in a denial. The campaign has been running many weeks, and the candidates have all been in the white light of publicity. Brain-Food Nonsenne.

Another ridiculous food fad has been branded by the most competent authorities. They have dispelied the stily notion that one kind of food is needed for brain, another for muscles, and still another for bones. A correct diet will not only nournish a particular part of the body, but it will sustain every other part. Yet, however good your food may be its nutriments is destroyed by Indigestion or dyspepsia. You must prepare for their appearance or prevent their coming by taking regular doses of Green's August Flower, the favorite medicine of the healthy millions. A few doses aids digestion, stimulates the liver to healthy section, purifies the blood, and makes you feel buoyant and vigorous. You have bought your coal and need a new grate cheap, call to see my samples and give me your order. Will sell you the grate alone, or make you a price on them set in your bouse. Will also furnish you with the very best coal.
